a) Information

1) General Information

The summer academy on the history of the Jews in the Holy Roman Empire and its successor states was established in 2009 as spin-off product of the research-cluster „The Jewish Holy Roman Empire“. From its inception the main objective of the summer academy has been to acquaint students and early career scholars with an intensive, critical, interdisciplinary, research-oriented and source-based training in the history of the Jews and their relations with the non-Jewish environment in Central Europe from the late 15th century to the present. The programme of the summer academy is focused on, but not limited to the Holy Roman Empire.

It comprises altogether five components, each of which consists of at least thirteen teaching units of 90 minutes each.:

1. Background Knowledge and Discussion
2. In-depth teaching units on the special topic
3. Excursions
4. Paleography Courses
5. Historical Moot Courts on the Ius Commune and Historical Jewish Law Moot Court

Paleography courses are offered in six different languages giving the participants the opportunity to acquire or enhance reading skills in original German, Hebrew, Yiddish, Judaeo-German and Judaeo-Spanish sources on different levels.

2) Special Topic of the Summer Academy 2017

„Jews and Jewish Communities in Public Ecclesiastical Law“ is the special topic of this year's summer academy. What, at first sight, appears to be a topic for specialists only, has historically been an important factor in framing the relationship between state, society and Jews as a community and as individuals. In European countries whose religious constitution is not based on the complete separation between state and church (Austria, Germany, France until 1905, Greece, Russia, Switzerland) the interface between state law and religious laws is still a crucial factor for understanding the relationship between Jews, state and society. Against the background of historical research being traditionally focused on the emancipation of Jews as individuals, the assumption of a general trend of secularization and the invention of the Jews as a modern nation the legal foundations for collective Jewish continuity in public ecclesiastical law have fallen into widespread oblivion. It is the objective of this year's summer academy to bring back this important, if marginalized part of Jewish history. It is crucial for the understanding not only of European Jewish history. Knowledge of the interface between state law and the laws of religious communities is also critical for understanding the political and legal system of the State of Israel.
